

Certificate in Information Security Management Principles

Accredited Training

QT&C's BCS-ISEB Certificate in Information Security Management Principles is an ideal qualification for those with information security responsibilities.

Course summary:

A thorough, practical, 5 day course designed to provide the knowledge and skills required to manage information security, information assurance or information risk based processes.

QT&C's CiSMP course is aligned with the latest national information assurance frameworks (IAMM), as well as ISO/IEC 27002 & 27001; the code of practice and standard for information security.

Who would benefit?

Although perceived as an IT issue, Information Security is in fact a subject relevant to all business units. The CiSMP program is ideal for members of information security management teams, IT Managers, security and systems managers, Information asset owners and employees with legal compliance responsibilities.

"QT&C, one of the Information Commissioner's Office training providers, delivered the ISEB CiSMP to senior management in 2008."

The course will act as a stepping stone to more advanced qualifications (either managerial or technical), and also sits nicely with existing project management and service management based programs.

Course Overview

The course follows the latest ISEB syllabus and prepares candidates for the 2 hour multiple choice ISEB examination.

This qualification provides candidates with detailed knowledge of the concepts relating to information security; (confidentiality, integrity, availability, vulnerability, threats, risks and countermeasures), along with an understanding of current legislation and regulations which impact information security management.

Award holders will be able to apply the practical principles covered throughout the course ensuring normal business processes become robust and more secure.
